

## Palm Oil Derivatives Traceability Investigation Based On Data from 2024

STEARINERIE DUBOIS FILS scope of RSPO mill disclosure includes its Level 1 mills, defined as those mills connected to 90% of STEARINERIE DUBOIS FILS 's traceable volumes, and therefore with the highest probability of actual connection to STEARINERIE DUBOIS's supply chain. Through the annual supply chain mapping performed by Transition as part of the industry collaboration, Action for Sustainable Derivatives (<https://www.bsr.org/en/collaboration/groups/action-for-sustainable-derivatives>) we are aware that our annual purchase volumes of palm derivatives are potentially linked to the majority of mills in Malaysia and Indonesia. However, we know that our greatest ability for influence and engagement remains where our supply chain concentrates. We therefore are disclosing this list of supplying mills as those that are most meaningful from a supply and sustainability materiality perspective, as they are connected to our highest volumes. STEARINERIE DUBOIS full mills list, covering 100% of traceable volumes, is available upon request.
